

Candidate & Program Overview

Candidate Details

Student Name: Harsh Aryan

Roll Number: 2410031314

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2024-2028

University: IILM University, Greater Noida, U.P.

Cisco Learning Program Details

Program Name: Cisco Virtual Internship Program

Specialization Domain: Networking and Cybersecurity

Duration: May 2026 – June 2026

Courses Completed:-

- ❖ Cybersecurity Essentials
- ❖ Exploring Networking with Cisco Packet Tracer
- ❖ Getting Started with Cisco Packet Tracer

Organization Profile: EduSkills Academy

EduSkills Academy is an ISO 9001:2015 and ISO 20000-1:2018 certified organization operating under the vision of "*Nation Building Through Skills*".

 **AICTE Collaboration:** Operates under the patronage of the AICTE National Internship Portal to empower engineering talent across India.

 **Industry Alignment:** Partners with leading global tech organizations to bridge academia and industry gaps in emerging tech.

 **Core Focus Domains:** Artificial Intelligence, MLOps, Cloud Computing, Cybersecurity, and Enterprise Automation.

Problem Statement & Industry Context

The Industry Challenge

- Cyberattacks are increasing rapidly across organizations worldwide.
- Many users and businesses lack awareness of basic cybersecurity practices.
- Weak passwords, phishing attacks, malware, and data breaches remain common threats.
- Organizations require skilled professionals who understand network and information security principles.

The Solution Scope

- The Cybersecurity Essentials program provides foundational knowledge of cybersecurity concepts.
- Covers threats, vulnerabilities, risk management, network security, and security best practices.
- Introduces learners to protecting systems, networks, and digital assets.
- Helps build a strong foundation for advanced cybersecurity and ethical hacking studies.

Core Project Objectives

Cybersecurity Fundamentals

Learn core cybersecurity concepts, including confidentiality, integrity, availability (CIA Triad), threats, vulnerabilities, and risk management principles.

Network Security

Understand network security mechanisms such as firewalls, VPNs, intrusion detection systems, and secure communication protocols.

Threats & Attack Prevention

Identify common cyber threats including malware, phishing, ransomware, social engineering, and methods used to prevent them.

Security Best Practices

Develop skills in password security, access control, data protection, incident response, and cybersecurity awareness.

Key Technologies and Security Concepts

Networking Infrastructure

- Routers
- Switches
- TCP/IP

Security Controls

- Firewalls
- VPNs
- Access Control

Threat Detection

- Malware Analysis
- Intrusion Detection
- Monitoring

Learning Platform

- Cisco NetAcad
- EduSkills
- AICTE Virtual Internship

Cybersecurity Learning Framework

Security Fundamentals

- CIA Triad
- Security Policies
- Risk Management

Network Security

- Network Infrastructure
- Firewalls & VPNs
- Secure Communication

Threat Analysis

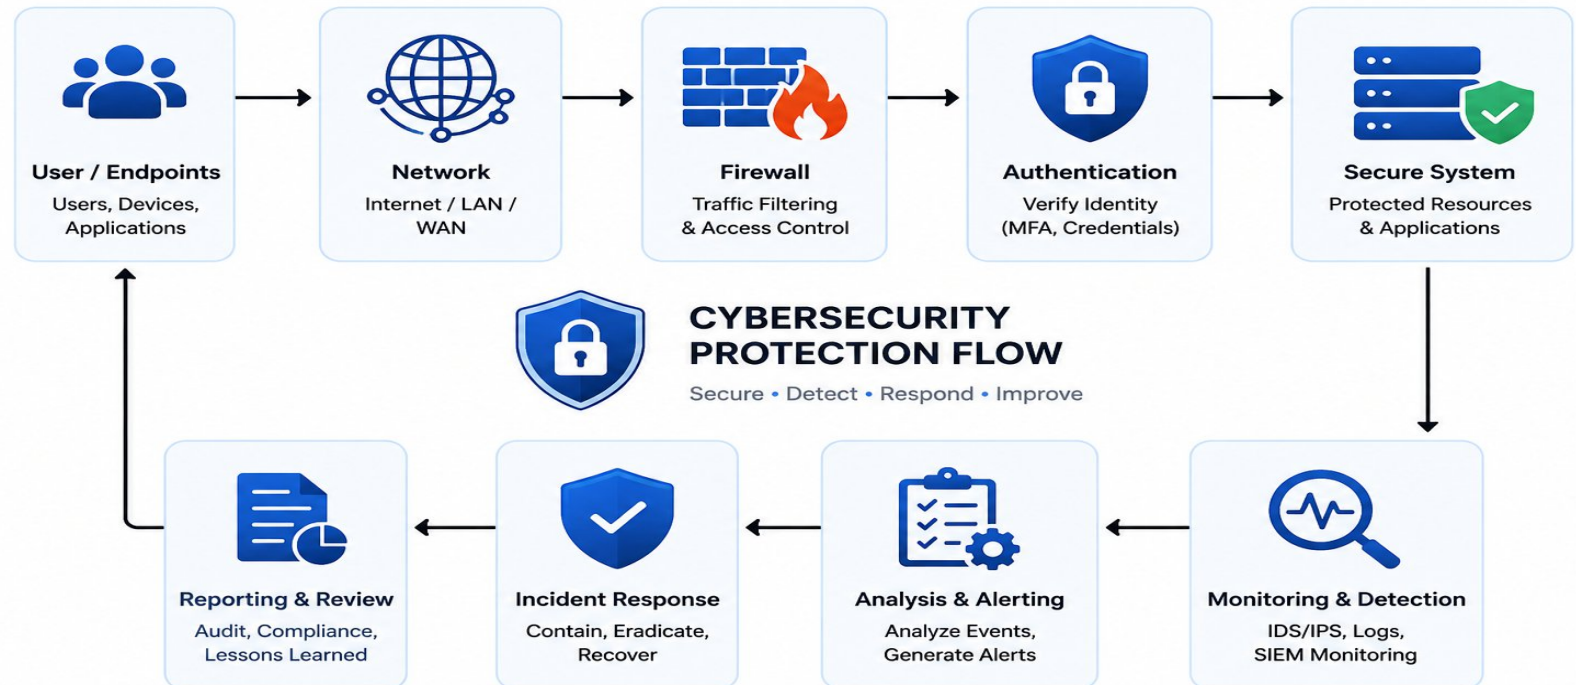

- Malware Identification
- Phishing Attacks
- Social Engineering Awareness

Protection Mechanisms

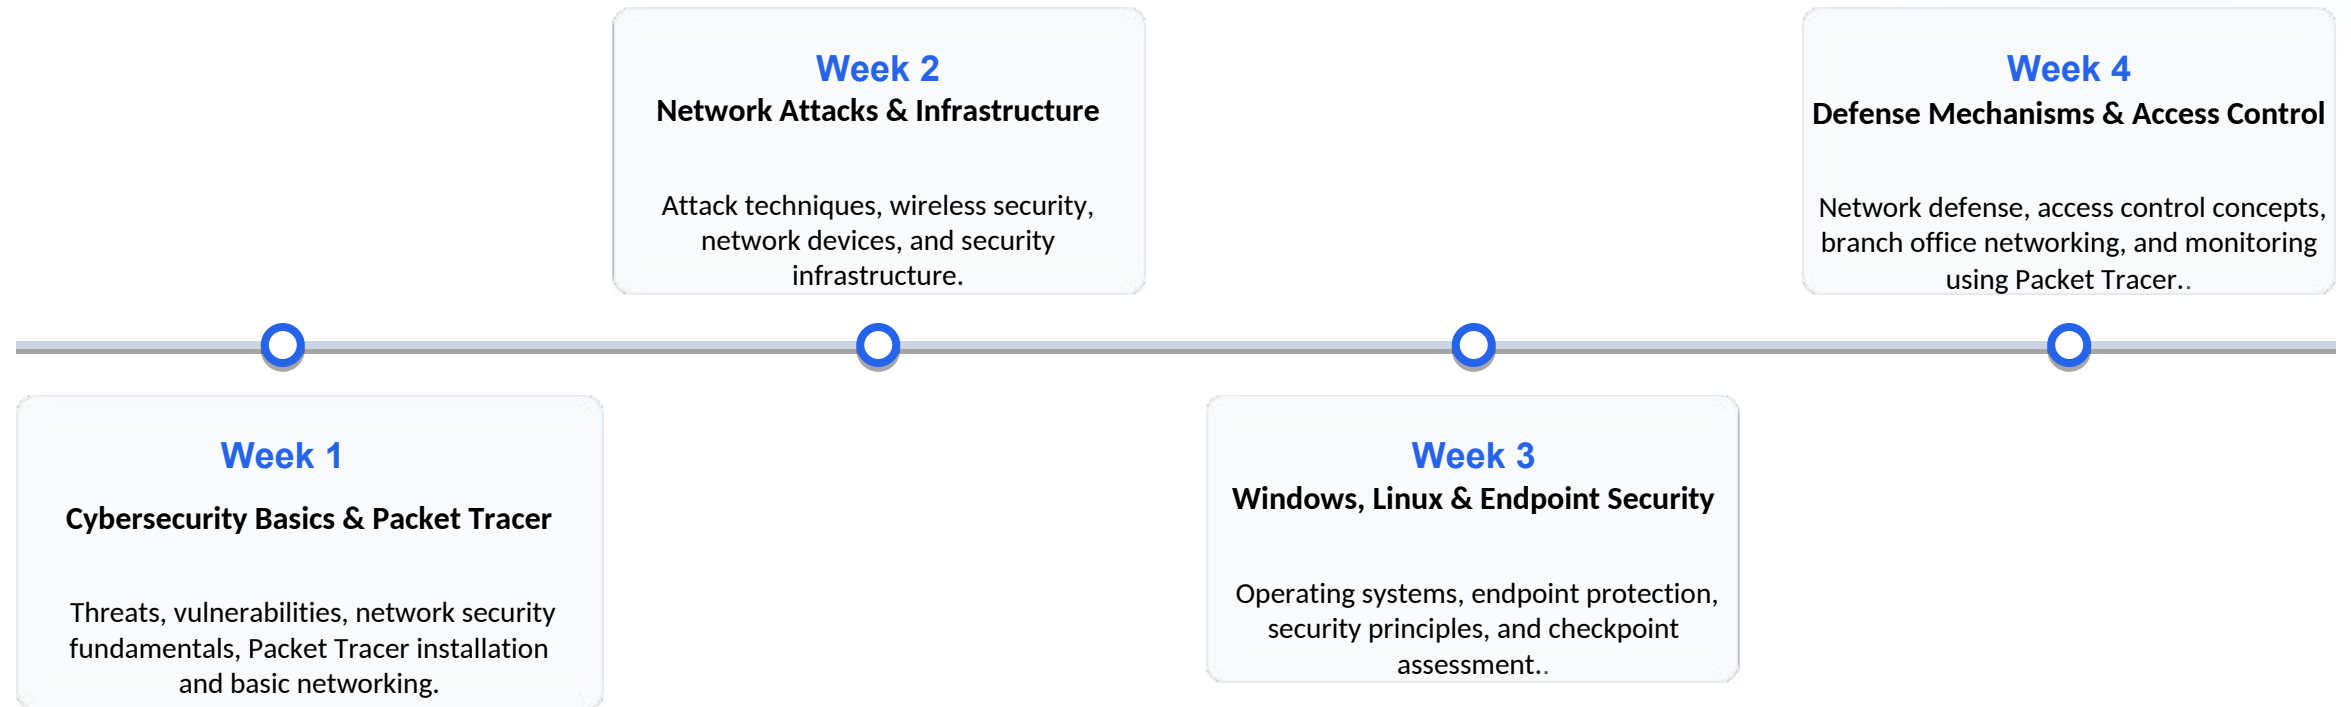

- Access Control
- Authentication
- Data Protection

Security Monitoring

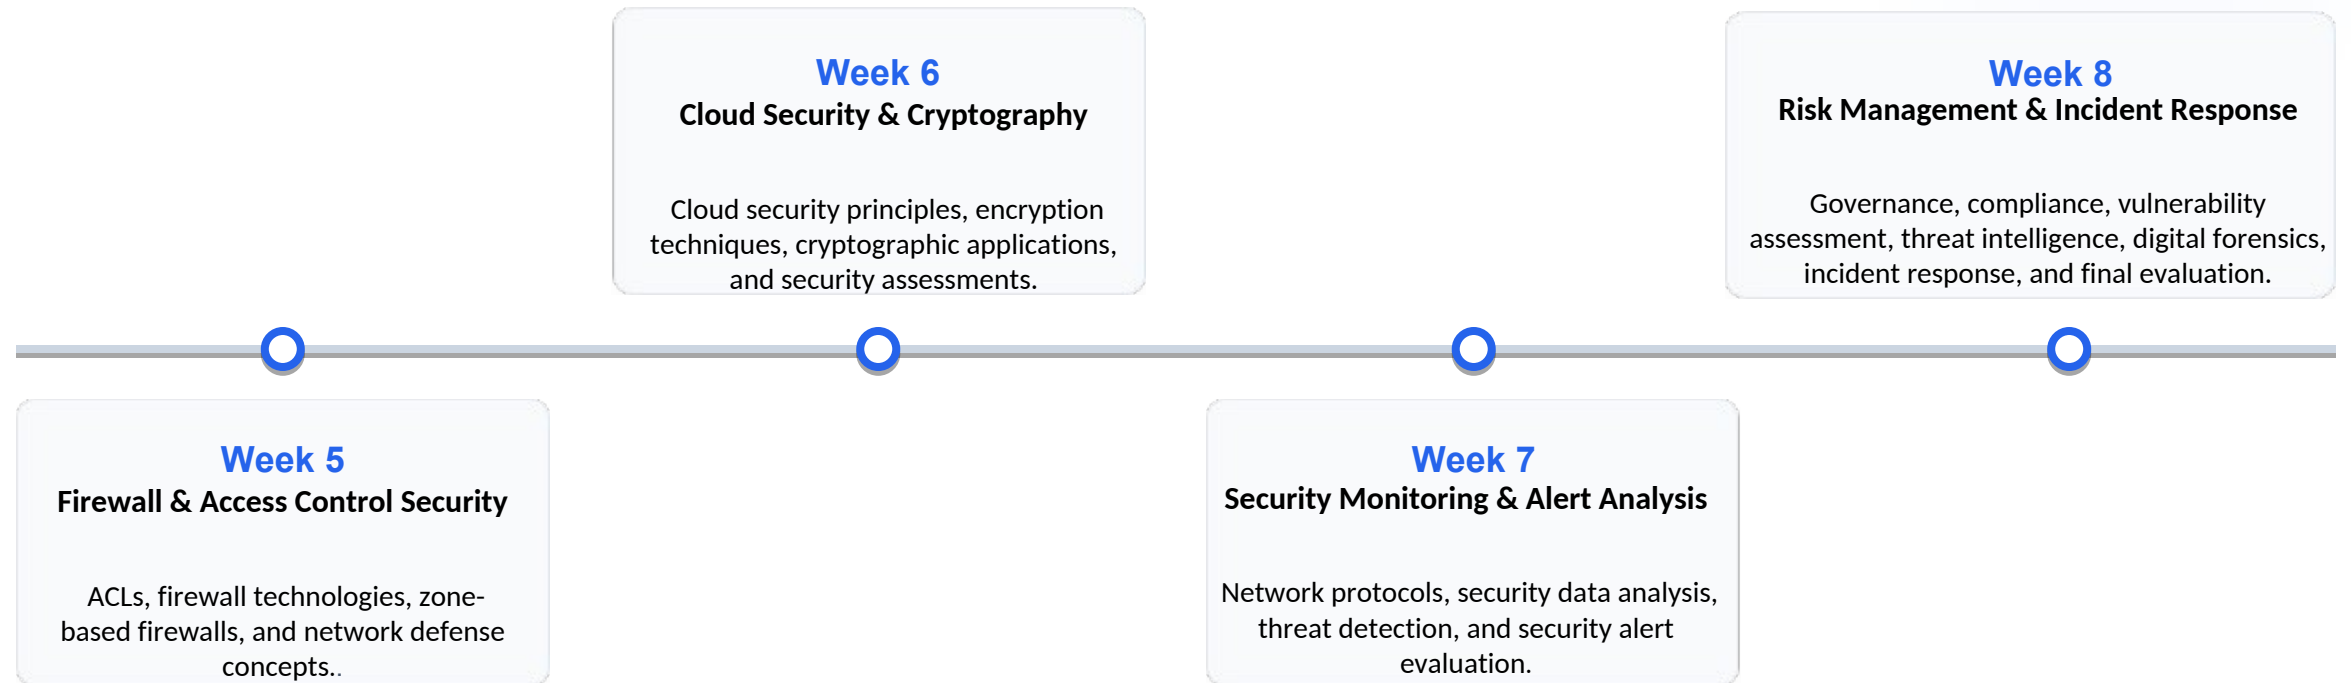

- Incident Response
- Security Auditing
- Continuous Monitoring

Curriculum Timeline (Weeks 1 to 4)

Curriculum Timeline (Weeks 5 to 8)

Key Learning Outcomes & Skills Acquired

✓ Network Security Fundamentals

Studied cybersecurity threats, vulnerabilities, attack vectors, and defense mechanisms used to protect organizational networks.

✓ Cisco Packet Tracer Network Design

Designed and simulated small office and branch office networks using Cisco Packet Tracer.

✓ Windows & Linux Security Administration

Learned operating system security concepts, user management, permissions, and endpoint protection techniques.

✓ Firewall & Access Control Implementation

Explored Access Control Lists (ACLs), firewall technologies, and zone-based security policies.

✓ Cloud Security & Cryptography

Studied cloud security principles, encryption techniques, cryptographic algorithms, and secure communication methods.

✓ Threat Detection & Security Monitoring

Analyzed security alerts, network security data, and incident indicators for threat identification.

✓ Vulnerability Assessment & Risk Management

Learned vulnerability assessment methodologies, risk analysis, security controls, and compliance frameworks.

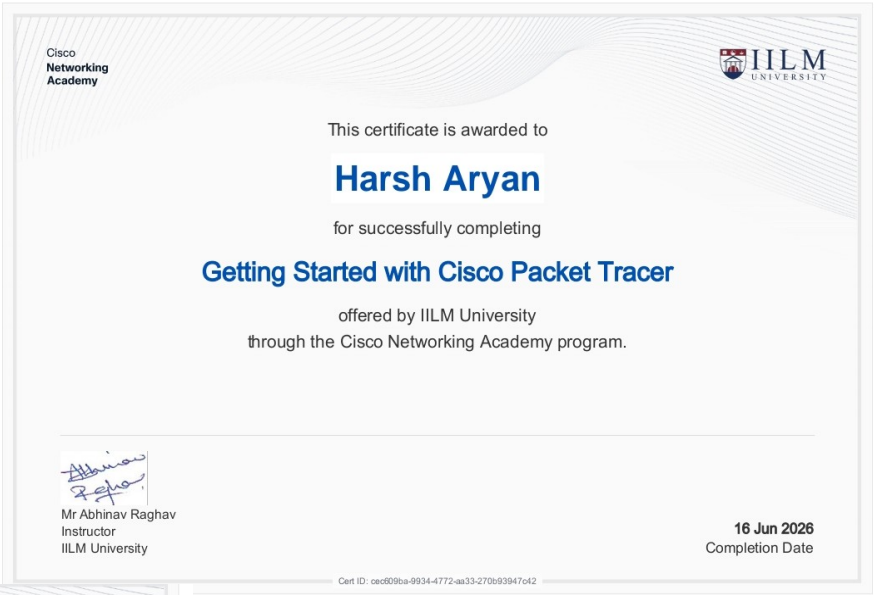

✓ Digital Forensics & Incident Response

Studied forensic investigation processes, evidence collection, incident handling, and response procedures.

Certification & Official Verification

Verification Metric	Official Record / Credential Details
Program Title	Cisco Networking Academy Learning Track
Courses Completed	Cybersecurity Essentials, Getting Started with Cisco Packet Tracer, Exploring Networking with Cisco Packet Tracer
Issuing Organization	Cisco Networking Academy
Academic Partner	IILM University
Certificate IDs	8-4e0eed9dc494
Certification Status	Successfully Completed

Certification & Official Verification

Thank You!

Harsh Aryan

Roll No: 2410031314

**School of Computer Science &
Engineering**

IILM University, Greater Noida, U.P.
